I'm here today to support the extension of Springer's
Express way to I-95. The idea of promoting
community connectivity is great. I understand
the city of Deerfield Bch is the most
opponent the whole project. I will love
to see everybody happy with this idea
and I believe the best way to
do it is with the Tunnel the
tunnel might be the most expensive
option here, but it will be the one
that will put a smile on all the
cities involved.

The created expectation of a discussion meeting type format and to arrive and be presented with a "station" format disappointed many attendees, including myself. Am not sure, even with staff and COT members responding to attendees questions that this was the best setup. Perhaps if there were avenues for the various communities to voice their concerns it would provide effective feedback to make the best decision for all concerns. On a personal note, my main thought is that in making whatever decision, don't tear up the connectivity of the City of Deerfield Beach in the process.

I am very concerned about the businesses in the area. If citizens are given only two choices to pick from, they are not given a fair representation of what could be, neither are they able to voice their opinions about the project. It seems as if the citizenry is being spoon-fed and Deerfield citizens will get the worst of this project.

There also is concern about the noise and the air quality that this will bring. I can see if we go along with your plans we will lose economic development in the area because there will be no access to our local businesses.

NW 10th street is a mess! I take the sawgrass
exwy to the turnpike and the back up to 10th
street is bumper to bumper. Widening the road
or building an overpass is necessary.
Noise walls is recommended,
barriers installed in turn lane to military.

I AGREE THAT SOMETHING HAS TO BE DONE TO IMPROVE THE TRAFFIC FLOW ALONG 10th ST. SW. FROM THE EXPRESSWAY TO I-95. - ALL CRITICAL CONDITIONS ARE NOTED ON THE STATION 4 - DISPLAY ^{& IT WOULD BE NICE TO HAVE ALL} HOWEVER AS A RESIDENT ALONG THE SW 10th ST. CORRIDOR - MY CONCERN IS EASY ACCESS & ACCESS TO THE EXPRESSWAY & TO I-95 REGULAR WITH SAFETY - NOISE FROM TRAFFIC IS A MAJOR CONCERN AND THE ABILITY TO EASILY GET TO LOCAL COMMERCIAL AREAS.

AS A current Board Member of the Coral Springs Chamber Board Member of the Coral Springs C.R.A., and Board Member of the Smart Growth Partnership I meet with many business owners. These business owners as well as myself believe this is a long overdue expansion, as well as crucial to economic growth for Coral Springs. A well needed east to west connector to Hwy 95. The expansion will have a huge economic impact for Coral Springs as we build our downtown project. Our downtown project ~~is~~ ~~density~~ relies on density of residential + businesses and we need a way to get folks to travel efficiently thus the ~~B~~ Sawgrass expansion is crucial.

This is the last piece of the east to west connector to 95. ~~It~~ It can only be a win win for everyone.

What is the purpose of widening SW 10th Street when there is no plan to do anything about widening the Sawgrass & the entry ramps to I-95.

Absolutely No overhead roadway!!

|| No depressed roadway.

The only viable option for Century Village would be a tunnel.

Also, what are the plans for Military & Powerline.

Sync the traffic lights!!!

This project needs compromise -
MPO should consider depressed express lanes
/tunnel for 10th St. corridor. Provide Adequate
noise and exhaust reductions.

If you are going to the trouble and
expense and disruption, the final product
should provide full cloverleaf interchange
between 869 Sawgrass and FL Turnpike

Very disappointed in this forum.
What would have been helpful would have been a 15 min presentation on a goal, options (all of them), what options are most appealing to MPO (we know down options to those MPO most interested in pursuing) and there are (5? stations) in the room where you can get ~~more~~ more info.

Nothing? No Ground laying?
No Plan B if we get a big group?

People are smart (majority) and make good decisions if given good & truthful information.

As a recruiter staffing companies for the past 20 years, the biggest impact to any company are their people. Payroll is the biggest expense and hiring the right people the biggest risk. People will accept or turn down a job largely on location. Location is the #1 consideration. I've staffed many companies east of Powerline on or around SW 10th Street. To extend the sawgrass to I-95 would dramatically impact on these companies ability to recruit and retain the best talent. The section from the Sawgrass Expressway + I-95 is a nightmare for those commuting during rush hour.

All parties at last committee meeting joyfully reached consensus that dropping road down (underpass) was the best answer. No one disagrees it needs to be done, just How. Why ~~was~~ ^{was} this ~~not~~ response and consensus dismissed? Does this mean an overpass is a "faite accompli" (excuse spelling)? Underpass is the peoples response, everyone wins, and we call it a day. If not willing to respond to that consensus, this is all a sham, and we will all know it.

I found the forum design to be extremely disorganized, poorly run in the fact that speakers were not able to be heard because of the # of people in attendance + the acoustics of the room. Individual verbal forums discussing each facet of the project would have fulfilled our desire to be completely informed. The mish mash of conversations only served to promote a lack of disseminating details or information. For such a professional + highly educated group to adopt this sort of forum as a manner to present vital information gives me pause. Or perhaps your intent was to promote a confused, loud, noisey, unprofessional, unproductive atmosphere and not resolve issues important to our beloved community.

Something must be done. The traffic congestion during peak hours is unnecessary as there exists plenty of right-of-way to solve this problem.

Don't let provincialism and limited thinking stop this. Good job on building consensus. Just hope we can move forward in a manner that is absent emotionalism. It is a regional issue and it will take a regional effort to solve the problem

Good luck

100
