

RE: QUESTION(S) - REQUEST FOR INFORMATION (RFI):

PROJECT: ACQUISITION OF PROBED GPS/MOBILE SPATIAL AND TEMPORAL DATA
By the Broward Metropolitan Planning Organization, on behalf of the Regional
Transportation Technical Advisory Committee-Modeling Subcommittee (RTTAC-MS)

The Broward MPO received the following question regarding the above-referenced Request For Information (RFI):

1. **QUESTION:** Will the RFI process (submittal and interview) lead to a final determination/selection of the provider of these data or will the RFI lead to an interim step involving an RFQ or RFP?

ANSWER: No, the Request For Information (RFI) process (submittal and interview) will not lead to a final determination/selection. The information gained from this RFI will aid the Regional Transportation Technical Advisory Committee-Modeling Subcommittee (RTTAC-MS) in defining its understanding of the availability and usability of this type of location based data prior to the anticipated release of a Request for Proposal (RFP) for the acquisition of the data.
