## TECHNICAL APPENDIX A.3: SR 7 BICYCLE AND PEDESTRIAN OBSERVATIONS

AUGUST 2015

For complaints, questions or concerns about civil rights or nondiscrimination; or for special requests under the Americans with Disabilities Act, please contact:

Christopher Ryan, Public Information Officer/Title VI Coordinator at

(954) 876-0036 or <a href="mailto:ryanc@browardmpo.org">ryanc@browardmpo.org</a>

## Table of Contents

ntroduction	2
Observations	1
List of Tables	
Table 1: Summary of Data Collection Locations	

## **INTRODUCTION**

As part of the SR 7 Multimodal Improvements Corridor Study, observations of bicycle and pedestrian movements were made during August and September 2015. Using the Hot Spot intersections previously identified in the study, a team of field technicians observed bicycle and pedestrian behavior at 15 locations in the study area.

Table 1 provides a review of the intersections and the date on which data was collected. Data was only collected on Tuesday, Wednesday, or Thursday to ensure the maximum effectiveness of the data collected.

**Table 1: Summary of Data Collection Locations** 

Hot Spot Location	Data Collection Date
SR 7 and Atlantic Blvd	August 18
SR 7 and Kimberly Blvd	August 19
SR 7 and Commercial Blvd	August 20
SR 7 and Broward Blvd	August 25
SR 7 and Davie Blvd	August 26
SR 7 and Johnson St	August 27
SR 7 and Oakland Park Blvd	September 1
SR 7 and Hollywood Blvd	September 2
SR 7 and Hallandale Beach Blvd	September 3
SR 7 and Sheridan St	September 8
SR 7 and Riverland Rd	September 9
SR 7 and Pembroke Rd	September 10
SR 7 and NW 12 <sup>th</sup> St	September 15
SR 7 and Stirling Rd	September 16
Sample Rd and Turtle Creek Dr	September 17

## **OBSERVATIONS**

The rest of the technical appendix contains the observations for each of the Hot Spots. Each Hot Spot has six data sheets: three for east-west movements and three for north-south movements. The three sheets for each direction represent a time of day: morning peak, mid-day, and evening peak. Graphics are provided in alphabetical order by roadway pair (as listed in Table 1) and then further organized with east-west movements for morning peak, mid-day, and evening peak followed by north-south movements for morning peak, mid-day, and evening peak.
